

Hills Reliance

Advanced Technology offers the best protection for your family

Safeguarding your family is a high priority.

Hills Industries designed the Hills Reliance Security System with the most advanced technology to protect you and your home. Strategically placed sensors blend into your décor, keeping your family feeling safe and secure.

The Hills Reliance – Keeping your family safe and protected.

Keeping my family safe and protected

Hills Reliance VoiceNav

Advanced Technology offers the best protection for your family

The Hills Reliance security system is simple to operate, allowing you to perform functions such as opening the garage door, controlling lights and heating. It provides the reliable performance and the security you and your family deserve.

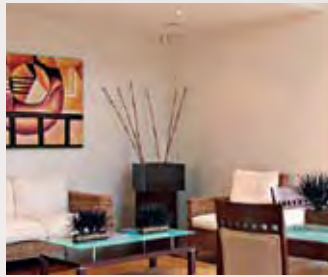

How Hills Reliance works for you

The Hills Reliance Security System uses a combination of door and window sensors, glassbreak sensors and interior motion sensors to detect unauthorised entry to specific areas of your home.

If an intrusion attempt is detected when the system is "Armed", a loud siren will sound to deter the intruder and draw attention. Sensors can be programmed with a delay - giving you time to leave after you have armed the system, and time for you to enter your code to disarm the system upon your return.

Code pads give you full control over the system and allow you to view the status of each device, and with the new VoiceNav code pad you can even talk to people in different rooms!

The Hills Reliance has the ability to report alarms to an 24hr Alarm Monitoring Station who can respond to the alarm according to your specific requirements (e.g. despatch a patrol, call you, a neighbour or a friend).

The Hills Reliance – Innovative. Stylish. Easy to Operate.

When you are leaving, a single key press will enable the Hills Reliance to monitor your home while you are out.

Just because you're at home doesn't mean your security should be turned off. The Hills Reliance can be armed in an "at home" mode providing perimeter monitoring of door and window sensors, leaving you free to move around inside knowing you are still protected against intrusion.

As you return home simply enter your PIN code to turn off your security system. Add the convenience of an optional key chain remote allowing you to Arm (both Stay and Away modes), Disarm, activate the system siren (panic alarm) and control your garage door - all from the one remote.

Each Hills Reliance code pad has three dedicated emergency buttons to allow you to alert your Alarm Monitoring Station in the event of a fire, medical or personal emergency.

The Hills Reliance VoiceNav security code pad makes operating your security system even easier with your own Interactive Personal Voice Guide. Imagine a voice walking you through step-by-step on how to use your security system, and telling you the status of the system instead of just blinking lights.

With a built-in intercom you can even talk to family and friends in different rooms or use it as a baby monitor.

Advanced features include: Modern Architectural Design, VoiceCheck Status Key, SmartKeys, Advanced Touch Interface, and Simple Menus.

Ask your security consultant for the Hills Reliance VoiceNav brochure.

Hills Reliance Optional Accessories

VoiceNav Code Pad

Icon Code Pad

LED Code Pad

Door/Window
Sensors

Smoke Detector

Motion Sensors

Combo Siren & Strobe

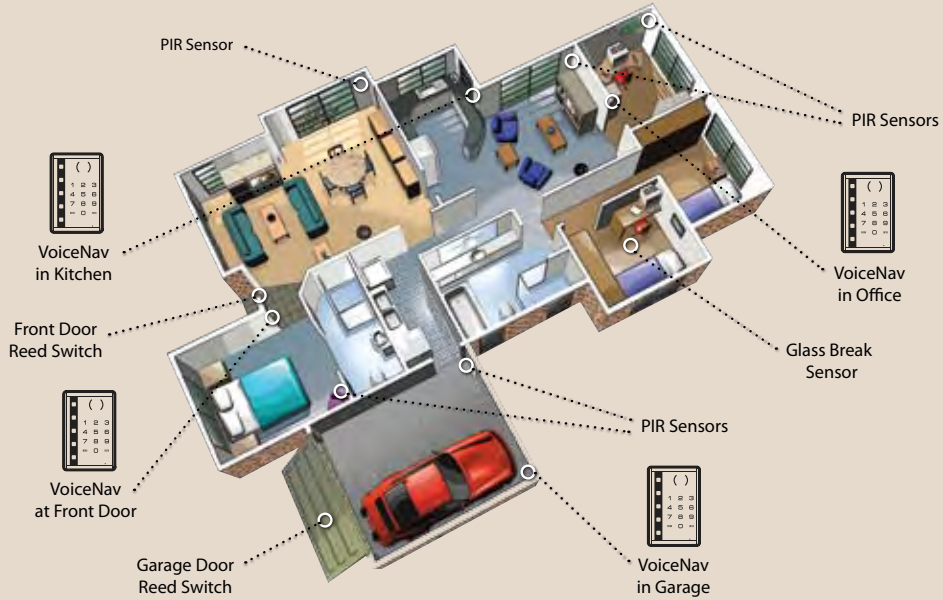

Keychain Remote

Enjoy the benefits of home automation...

...by adding automation modules to the Hills Reliance Security System. Imagine living in a modern home that responds to you:

- Air conditioning and lights turn on when you return home and turn off the system
- Exterior lights stay on until the exit time expires when you leave the house
- Motorised curtains and blinds close when you partially arm your system to go to sleep at night
- Carry just one remote to control your security system, gates and garage doors

FloorPlan

Installing Hills Reliance VoiceNavs around your home keeps your family connected with the intercom feature. For example, one upstairs and one downstairs.

Ask about other Hills Home Products

Distributed Audio System

Imagine being able to select your favorite music from one of four sources (e.g. MP3 player, computer, CD player, radio) in different locations within your home. You'll love the Hills Home Music system.

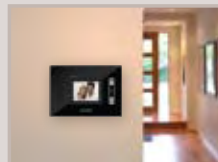

Hills Home Hub

The Hills Home Hub delivers and distributes data, phone, video, audio and TV signals using the latest in data and TV cables from a centrally located enclosure to specially configured wall outlets in any room of the house.

Ducted Vacuum

So convenient! No noise, no bags to empty, no electrical cords to plug in and no bulky unit to drag around and bump into your furniture. Simply plug the hose into outlets around your home.

Video Intercoms

A Kocom video intercom lets you see who is at your door or front gate before you open it.
